

Date:

## Wednesday Challenge Form

**Group Members:** Half the class (captain-Raul)

### Problem Statement:

Roll a marble to a bag while using pbc pipes cut in half.

People hold the pieces of pipe and the ball travels across them. Everyone has to hold a piece of pipe and have the ball roll over it. Lastly, you cant move if the marble is on your pipe.

### Approach:

We stood shoulder to shoulder all the way to the bag. The first half of the people held pipes so that they were next to/right below the person next to them. Once the marble rolled over the pipe then you would run down and hand the piece of pipe to a person who didn't have one. We first went too fast but then as we slowed it down, it was much easier and completed the task.

### Solution:

We rolled the marble as slow as we could and took our time. Everyone tried to keep their pipe as straight as possible.

### Lessons Learned:

If I were to do the challenge again I would start the challenge by rolling the ball as slow as possible like we did during the second half of the challenge. We also learned how to work better as a team and use skills to help encourage others instead of criticize them.
