## Wednesday Challenge Form

Group Members: Half the class

### Problem Statement:

Complete 3 stages of a task where half of the class has a tube and they have to pass it to the next person without dropping any. First everyone had to sit. Second, everyone had to stand. Third, pass it to every other person while standing

### Approach:

Jonathan gave a countdown and when he got to 1, everyone passed it at the same time. If someone messed up nobody got mad at that particular person.

Solution: My group won because we had patience and good techniques

### Lessons Learned:

Patience is key to success.
